

Grounds Management

SSC believes that a learning environment should always be safe, clean, and well managed; a place that students, faculty, and parents can be proud of both inside and out. One of the cornerstones of a successful learning environment is a well-kept and managed landscape — a landscape that makes people say “wow” upon their first viewing. Recent studies suggest that a well maintained learning environment furthers the success students and staff can achieve.

ANNUALLY

SSC has built our grounds philosophy on “curb appeal;” that first impression you get before you enter the building. We offer a three-tiered program in managing grounds that can be fully customized to meet your needs. SSC’s full service program manages all facets of grounds, landscape, and athletic fields with our management team and support personnel. Our hybrid program is a mix of management and key staff, as well as the use of a subcontractor for seasonal tasks. Finally, our oversight program provides a trained SSC management team to oversee your in-house grounds, landscape, and athletic field management personnel.

SSC has developed an all encompassing Grounds Management program that provides comprehensive management of your grounds with a strong emphasis on curb appeal. Our team is comprised of industry leaders who have decades of experience and the highest level of Grounds Management certifications. SSC adheres to a state-of-the art sustainability program to provide the utmost care for your grounds, the environment, and the outside community. While most firms may strive to maintain or retain your grounds, SSC aims to manage them, continuously looking for improvements and upgrades. The below service details can be combined:

GROUNDS MANAGEMENT

- Parking lots/garages
- Walks/curbs/drains
- Weather-related plan/pre & post response
- Mowing/edging/trimming of lawns (MET)
- Fence repairs/install
- Moving/setup for non-sport events
- Management of all associated equipment

LANDSCAPE MANAGEMENT

Our certified Landscape Professionals and Horticulturists provide premium management for:

- Trees, shrubs, perennials, and seasonal flowers

- Installation and maintenance of water features and container gardens
- Installation/removal of sod
- Overseeding/fertilizing lawns
- Integrated pest management (IPM)/organic management programs to assist with LEED program
- Irrigation calibration, operation, and maintenance & repair

EQUIPMENT

SSC provides the best and most environmentally friendly equipment, tailored to your needs, at the onset of every engagement.

SUPPLIES

Industry’s best supplies are procured through a network of professional manufacturers/growers. Having access to multiple suppliers allows us to develop, implement, and manage tailored grounds, landscape, and athletic field management programs.

PLAYGROUND MANAGEMENT

Our certified Playground Safety Inspectors (CPSI) provide the highest level of professionalism in implementing high- and low-frequency inspection programs to on-site personnel. We provide audits to meet internal or insurance requirements.
