

OUR COMMITMENT TO GREEN

SSC Sustainability Initiatives |

Sustainability is about much more than just using green chemicals during cleaning, which is why SSC has developed a multifaceted approach around energy, the environment, and empowerment.

ENERGY

We reduce our use and lower our environmental impact by focusing on electric equipment, solar energy, and Energy Use Intensity (EUI) assessments. Our goal is to implement the most impactful adjustments to reduce energy usage and provide cost savings for our partner schools.

OUR ENERGY COMMITMENTS

1

Establishing baseline metrics to identify opportunity areas.

2

Optimizing HVAC, LED lighting and electric equipment.

3

Transparent reporting of our energy reductions and cost savings.

ENVIRONMENT

From water conservation to a full line of environmentally certified cleaning products, SSC ensures the task is done correctly while maintaining our commitment to the environment on every level of our service. We focus on initiatives that target:

- ▶ Water Purity
- ▶ Recycling
- ▶ Water Conservation
- ▶ Plant Life

OUR ENVIRONMENT COMMITMENTS

1

Utilizing green cleaning supplies to reduce our carbon footprint.

2

Purchasing sustainable supplies that are made of post-consumer and industrial recycled waste.

3

Enriching grounds through organic fertilizers and the use of native species.

4

Converting all gas-powered equipment to electric to reduce noise pollution and emissions.

EMPOWERMENT

We want our team members to stay curious. To encourage this, we invest in continuing education in sustainable practices with certifications like LEED, Certified Arborist and smart salting.

OUR EMPOWERMENT COMMITMENTS

1

Sharing knowledge and results to encourage growth and collaboration.

2

Finding alternative and sustainable solutions because it's the right thing to do.

3

Stewardship through certifications & training.
